

Basic programmig with Scala

M.C. Oscar Vargas Torres

January 25, 2014

1 Your development environment for this course

I recommend you install these:

- Latest IntelliJ IDEA EAP version from here:
<http://confluence.jetbrains.com/display/IDEADEV/IDEA+13+EAP>
- Java 8 (the current java source code requires JDK 8) from here:
<https://jdk8.java.net/download.html>
- sbt (one of the Scala build tools available) following the instructions here:
<http://www.scala-sbt.org/release/docs/Getting-Started/Setup.html>
- git for your OS of choice.
